Digital Literacy awareness quiz

* Indicates required question

1. You receive an urgent email from "supp0rt@google-alert.com" stating your account will be suspended in 24 hours unless you click a link to verify your password. What is the safest course of action? *

Mark only one oval.

- Click the link and enter your password quickly to save your account.
- Reply to the email asking if it is legitimate.
- Forward the email to all your contacts to warn them.
- Do not click any links; mark the email as phishing/spam and check your account directly via the official website or app

2. Briefly explain why it is a major security risk to use the exact same password for multiple online accounts (e.g., your university portal, email, and social media). *

3. What is the primary purpose of enabling Two-Factor Authentication (2FA) or Multi-Factor Authentication (MFA) on your online accounts? *

Mark only one oval.

- To speed up the login process so you don't have to type your password every time.
- To prevent websites from tracking your browser cookies and search history.
- To add an extra layer of security by requiring a second form of verification (like a text code or authenticator app) in addition to your password.
- To automatically back up all your account data to the cloud.

4. If an article or infographic is shared heavily on social media by your friends and has thousands of likes, which of the following statements is true? *

Mark only one oval.

- It is guaranteed to be factually accurate because so many people have vetted and agreed with it.
- It could still be misinformation or fake news; you should verify the claims through credible, independent sources before believing or sharing it.
- It is only true if it includes a picture or a quote from a celebrity.
- The social media platform has already fact-checked it, otherwise it would have been deleted.

5. Which of the following best describes your "digital footprint"? *

Mark only one oval.

- The amount of storage space your files take up on a hard drive.
- The physical carbon emissions generated by charging your devices.
- The trail of data you intentionally and unintentionally leave behind while using the internet, including social media posts, browsing history, and location data.
- The software used by antivirus programs to scan for malware.
